

Frontend Developer

At Woffu, we bet on "liquid work". The fluidity of internal processes helps companies improve the relationship with their employees, generating an efficient and pleasant work environment. Manage vacations, absences, presences and shifts is a very complex task. Woffu is a SaaS / cloud-based software that solves this problem by contributing directly to facilitate the life of employees, team leaders and Human Resources departments.

Our history began in 2015 and our growth since then has been staggering, making Woffu a reference in the sector. We are currently present in Spain and expanding internationally. With a team of 16 highly-motivated people and 500 clients, our project is just starting and we want to build the right team to capitalize on this huge potential.

We're looking for a talented and passionate Frontend Developer to join our product team in Barcelona. As a high-growth organization, we need an architecture that scales in a big way.

Your missions

- Create highly qualitative interfaces for our users, adaptable to all user conditions
- Develop new functionalities in the product and improve existing ones
